

Self-powered Wireless Light Switch

Self-powered, Reliable Wireless Lighting Control

Ad Hoc Controls has engineered self-powered wireless solutions for residential, commercial and retro-fit applications. Self-powered wireless light switches enable fast installations & reliable control.

RELIABLE RANGE

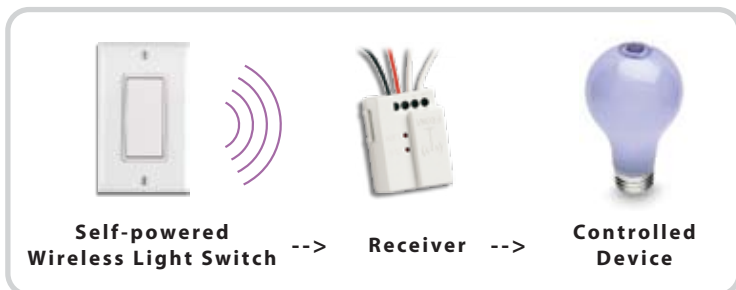

- up to 150' indoors
- 315 or 868 MHz operating frequency
- Rated to last 20+ years (Lab-tested to support 10,000+ actuations)

FAST INSTALLATION

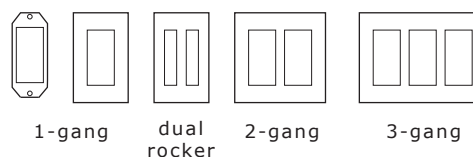

- Less copper wire
- Can be mounted anywhere
- No switch boxes

BATTERY-FREE WIRELESS LIGHTING CONTROL

Basic controls

DECORATOR STYLE OPTIONS

COLORS

- White (WH)
- Black (BK)
- Silver (SL)
- Brown (BR)
- Light Almond (LA)
- Ivory (IV)

Decorator (standard) available in black, brown, light almond, ivory, and white
 Decorator (dual rocker) & Euro available in white and black only
 Handheld Remotes available in silver, white and black

**1/3 Less Time
Less Copper**

Because there is no wire between the light and the switch, installers save one-third the time and materials when using the Ad Hoc Controls system.

SAMPLE APPLICATIONS

Remodels & Retro-fits

Avoid tearing into walls and running new wire. Self-powered light switches mount on any flat surface or fit in existing switch boxes. **Installers stay out of the walls**

Quick & Easy 3-way Switches

3-way light switches can be installed in minutes!
 No 14-3 wire is required..

COMPATIBLE RECEIVERS
